Notes

It is the responsibility of sub-contractors and third party suppliers appointed by Enigma to ensure and comply with the following:

1. All materials and construction elements to be installed in accordance with local authority fire & safety regulations.
2. All construction to be in accordance with local authority definitions, regulations and standards of the International Fire and Safety of the building users, of energy conservation, and access and facilities for disabled people.
3. All construction and installation to be completed in accordance with the programme of work, and in accordance with approved engineering project specifications and detailed production schedule.
4. All contractors to supply all relevant engineering calculations and documentation in respect of local authority regulations.
5. All sub-contractors to ensure that all work is carried out in accordance and adhere to local authority customs regulations & duties.
6. Main Sub-Contractors to ensure all delivered items to be installed, cleared, & correctly installed in accordance with the signed off engineering production schedule.
7. All contractors to ensure all delivered items to be installed are not damaged, and the fabric of the building and its contents are not damaged or incurred to the venue during installation or de-ig. Damage will be at the sub-contractors responsibility.
8. All sub-contractors to produce own initial de-ig risk assessment documentation and supply a copy to Enigma and the venue show organisers where they are required.
9. All sub-contractors to ensure a minimum £200,000 third party indemnity is in place for the duration of the event. Copies to be provided as proof of cover during the Insured period required.
10. It is the responsibility of all sub-contractors to advise Enigma of any areas of damage or safety concerns by email with any documentation that must be the delivery or safety of the product.
11. It is the responsibility of all sub-contractors to ensure that all production and installation is carried out in accordance with the signed off engineering production schedule and in accordance with any de-ig following closure of the audience, and any other safety concerns.
12. All equipment utilised in the delivery of the product or products ordered are to be approved and certified as safe and fit to use by the workforce and that
